## High-speed Light Adaptation

Sunmatic III lenses are designed to keep up with your active lifestyle, seamlessly transitioning between indoor and outdoor environments.

- ✓ **Rapid Activation:** Reaches approximately 76% of its full tint in well under a minute—specifically about 25 seconds.
- ✓ **Fast Darkening:** In ideal conditions, these lenses can reach 85% darkness in approximately 26 seconds.
- ✓ **Quick Fade-Back:** Once indoors, the lenses return to near-clear (~90% transmission) in about 3 to 5 minutes.

## Total Protection and Clarity

Prioritise your eye health without sacrificing the clarity of your vision.

- ✓ **100% UV Protection:** Blocks all harmful UVA and UVB rays up to 400nm, providing constant protection even when the lenses are clear.
- ✓ **Exceptional Indoor Clarity:** These lenses look virtually clear indoors with no noticeable color cast.

## Versatile and Customisable

Sunmatic III is designed to be highly flexible, making it compatible with almost any prescription or style preference.

- ✓ **Wide Material Range:** Available across a full spectrum of lens indices, including 1.50, 1.56, 1.60, 1.67, and 1.74.
- ✓ **Any Lens Design:** Can be integrated into virtually any design, from single-vision and bifocals to advanced freeform progressives and office lenses.
- ✓ **Durable Coatings:** Features a protective hardcoat to ensure stable performance for years with proper care.
- ✓ **Blue Light Upgrade:** For heavy digital device users, upgrade to Blue Guardian for enhanced blue-light filtering up to 420nm.

To learn more about **Sunmatic III** or to discuss suitability for your patients, contact your local Opticare lab. For practices based in VIC, ACT, SA, TAS, and NT, please call our Head Office.
