

AOimage™

Software for the rtx1-e™
Adaptive Optics Retinal Camera

Adaptive optics imaging made easy.

The **AOimage™ software** has been designed in collaboration with ophthalmologists and retinal photographers to provide the most intuitive interface to the rtx1-e™ Adaptive Optics Retinal Camera.

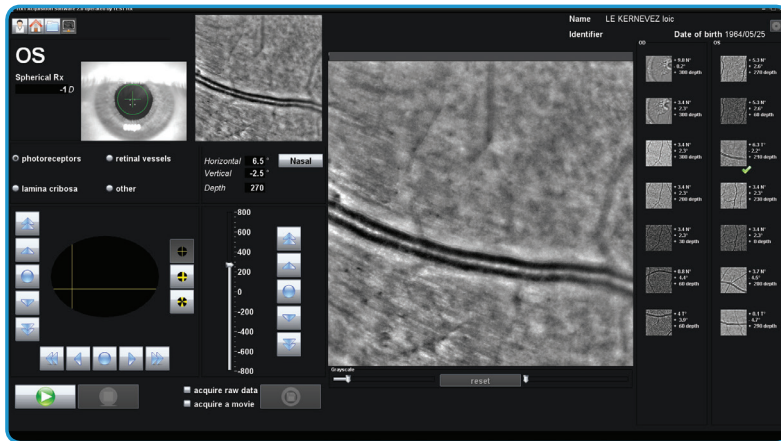

OPTICARE

Aoimage™

Software for the rtx1-e™ Adaptive Optics Retinal Camera

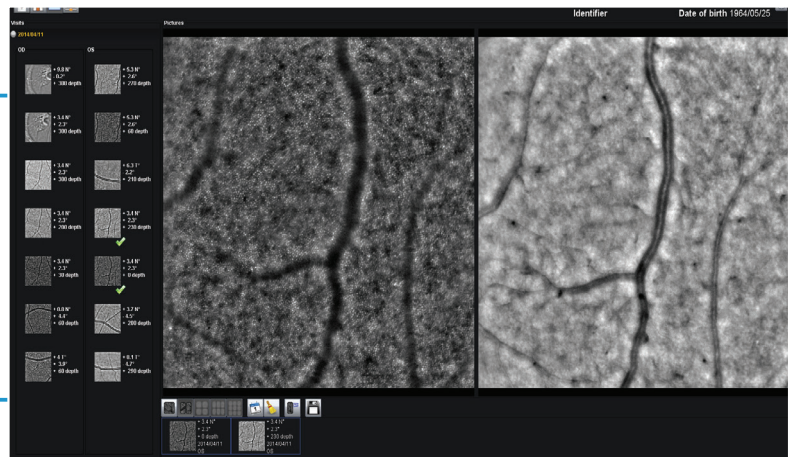

Easy to Use

- Intuitive user-friendly interface
- Simplified controls of localisation, focus and image capture
- Multiple selectable fixation target patterns
- Interface compatible with dim lighting conditions

Efficient

- Fully automated Adaptive Optics operation
- Fast multi-thread image processing

Convenient

- Follow-up functionality
- Network-compatible database
- Remote Access Viewer (optional)
- Export to multiple image formats including PNG and DICOM
